### **Wiseneosco India Pvt. Ltd., Gr. Noida – Full-Stack Developer**

MARCH 2023 – PRESENT

- Assisted software planning, development and testing for server, client and web-based deployments
- Helped compose dedicated mobile and internet-only versions of software

### **Project Overview:-**

**Name: Smart Library Management System**

**Institution: Sunchon National University**

The Smart Library Management System at Sunchon National University includes mobile, kiosk, and web applications built with React Native, React JS, Tauri, Electron JS, NodeJS, and Spring Boot. It offers seat, group study, and career room reservations, as well as book borrowing via third-party APIs. The mobile app is cross-platform, the kiosk system enhances on-site access, and the web app provides a robust online interface. Databases used are MySQL and MS SQL. This system improves user experience and streamlines library operations.

**Name: Gate Control System**

**Institution: Wise neosco korea**

I developed a Gate Control System to manage user entry and exit using RFID cards and speed gates. The software was built with ReactJS, Electron JS, NodeJS, Prisma, MySQL, and MS SQL, with real-time communication facilitated by Socket.io. This system ensures secure and efficient access control for users.
