

RAJNISH PANDEY

Full Stack Developer · React.js · Next.js · Node.js · TypeScript · MERN · GoLang 4+ Years

Delhi NCR · +91-7985574363 · rajnishpandey010@gmail.com · linkedin.com/in/rajnish-pandey-21a47a1a7 · github.com/rjrajnish

PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years engineering high-traffic, SEO-optimised news and SaaS platforms. At India Today Group Digital, built and scaled products serving 15M+ combined monthly users (The Lallantop, SportsTak, Newstak) using Next.js SSR/SSG, React.js, TypeScript, and Node.js. Proven expertise in real-time systems (WebSocket, Redis), REST/GraphQL APIs, AI integrations, and cross-platform desktop apps. Certified in Advanced AI Workflows, Google Cloud, Advanced Prompt Engineering, and Generative AI Software Development. Seeking a senior front-end/full-stack role focused on React.js and TypeScript at scale.

TECHNICAL SKILLS

Frontend	React.js, Next.js, TypeScript, Redux Toolkit, Tailwind CSS, HTML5/CSS3, SSR/SSG, Core Web Vitals, SEO Optimisation, React Query, TanStack, Jest / React Testing Library
Backend	Node.js, Express.js, NestJS, GoLang, Python/Flask, REST APIs, GraphQL, WebSocket, Microservices, Middlewares
Databases	MongoDB, MySQL, MSSQL, Redis, Prisma ORM
Cloud/DevOps	AWS, GCP, Docker, Nginx, Git, Linux, Agile/Jira/Scrum, Postman
AI & APIs	Gemini API, OpenAI/Codex, Prompt Engineering, LLM-powered workflow automation, AI SEO generation

WORK EXPERIENCE

Full Stack Developer · India Today Group Digital

Aug 2024 – Present

Next.js · React.js · TypeScript · Node.js · Redis · WebSocket · AWS · SSR/SSG | News & Media · Delhi NCR

- **Architected SSR/SSG pipelines** across Newstak, The Lallantop, Uptak, and SportsTak using Next.js + TypeScript, cutting page-load time by 40% and reducing JS bundle size 35% via code-splitting and lazy loading — maintaining 99.9% uptime.
- **Grew user engagement 30%** by delivering SEO-optimised news pages with structured data, canonical tags, and Core Web Vitals tuning — platforms now serve 5M+ monthly users (The Lallantop) and 10M+ concurrent users during IPL live events (SportsTak).
- **Built real-time election dashboards** for State and Lok Sabha elections with live result feeds and interactive map widgets using React.js + WebSocket, handling traffic spikes by pre-rendering static shells and streaming live data.
- **Engineered a TypeScript React component library** (40+ components) with strict typing, adopted across all four brand properties — reducing per-feature dev time by 20% and eliminating an entire class of runtime prop errors.
- **Led AI integration initiatives** embedding Gemini API into the CMS workflow to auto-generate SEO meta tags, JSON-LD schema, and article summaries — cutting editorial metadata effort by ~60% per article.

Full Stack Developer · Wiseneosco India Pvt. Ltd.

Mar 2023 – Jul 2024

React.js · Redux · Javascript · Node.js · Electron.js · WebSocket · Redis · MongoDB | B2B SaaS

- **Built 3 cross-platform Electron.js desktop apps** with React.js + Javascript (Redux) frontends and Node.js/Express backends, deployed to enterprise clients managing 500+ daily active operators across inventory, access control, and reporting workflows.
- **Developed reusable React component architecture** with custom hooks, reducing UI code duplication by 40% across desktop and web-based products and improving developer onboarding speed.
- **Built a real-time WebSocket + Redis notification system** processing in-app alerts for 200+ concurrent users with sub-100ms delivery latency, replacing a polling mechanism that generated 10× the server load.
- **Owned full SDLC** from requirement gathering through deployment — reducing average feature delivery from 3 weeks to 11 days by introducing sprint planning and PR review conventions with a 4-person team.

React Developer · byPeople Technologies Pvt. Ltd.

Apr 2022 – Feb 2023

React.js · TypeScript · Node.js · REST APIs · MySQL | B2B SaaS · Ahmedabad (Remote)

- **Built 10+ React.js frontend modules** for B2B SaaS products covering HR workflows, reporting dashboards, and client portals — shipped with reusable TypeScript component patterns that cut per-module build time by ~25%.
- **Contributed to REST API architecture decisions** standardising contract design across the backend team, which reduced inter-team integration bugs during QA by approximately 30%.

KEY PROJECTS

TAK Network Platforms <i>Next.js · Javascript · SSR/SSG · Node.js · Redis · WebSocket</i>	Election dashboards, live IPL hubs, and news feeds for The Lallantop, Newstak, Uptak & SportsTak. Serves 15M+ combined monthly users; handles 10M+ concurrent during IPL. SEO architecture achieved 40% load-time reduction.
Hyundai Explorers CRM <i>MERN · CRM · Media Upload</i>	Full-stack adventure booking platform (hyundaiexplorers.com) with slot management, customer CRM & media uploads. Manages 1,000+ booking transactions per month for Hyundai's experiential campaign.
AI SEO Generator <i>GoLang · MongoDB · Gemini API · AI</i>	Automated content tool generating SEO articles, meta tags, JSON-LD schema & CMS exports via Gemini API. Reduces editorial metadata effort by ~60% per article; in active use by the India Today editorial team.
RFID Gate Access System <i>React · TypeScript · Node.js · Electron · RFID</i>	Real-time RFID authentication with IN/OUT dashboard & operator controls. Deployed at 3 enterprise sites; increased gate throughput by 30% vs manual check-in.
Sunchon University Smart Library <i>React · Node.js · Electron · RFID · MSSQL</i>	Multi-platform seat/room reservation system and mobile book-borrowing app. Used daily by 800+ students & faculty; improved operational efficiency by 30%.

EDUCATION

MCA (Master of Computer Applications) · Dr. APJ Abdul Kalam Technical University (AKTU), Lucknow	2018 – 2021
B.Sc. Mathematics · Chhatrapati Shahuji Maharaj University, Kanpur	2014 – 2017

CERTIFICATIONS

Advanced Prompt Engineering · Simplilearn	Apr 2026
Generative AI Software Development · Simplilearn	Mar 2026
Advanced AI Workflow Automation · Coursera	Jan 2026
Cloud Computing & Prompt Engineering · Google	Feb 2026
